

MCSE Certification

MCSE - “One of the most widely recognized high-level Microsoft Certification today“

Microsoft Certified Systems Engineers, MCSEs, design and implement an infrastructure for business solutions based on the Windows platform (MCSE 2000) and Microsoft Server System (MCSE 2003). Both of these MCSE tracks include specializations as MCSE: Messaging and MCSE: Security.

MCSE on Microsoft Windows 2000 is appropriate for IT professionals working in the typically complex computing environment of medium-to-large organizations. These professionals design and implement business infrastructures based on Windows 2000 platform.

MCSE on Windows Server 2003 includes all the functionalities of the Windows Server Operating System, such as security, reliability, availability, and scalability. Earning MCSE 2003 validates your ability to make infrastructures more efficient, keep everyone productive, and deliver more applications. These tasks on the latest Microsoft server operating system demonstrate your expertise to employers, clients, and peers.

How can you prepare effectively?

You have identified your goal and are ready to prepare yourself for these highly recognized certification exams. You want to score high, the course is large and the time is less. The Question is:

- * How to prepare fast and accurate?
- * How to focus on important topics first, master them fast and retain what you've learnt?

Through Simulator - A scientific method to prepare

The solution lies in the approach towards your study. One such approach is through an exam simulator that simulates/replicates the actual exam environment with similar types and patterns of questions. It is designed to guide you and help acquire the optimum momentum during the course of your study.

Whizlabs has designed and developed exam simulators as a certification preparation tool, which makes use of a “**scientific approach**” of study. With its unique features, these exam simulators assist you in your preparation for the certification exam by highlighting your strengths and weaknesses.

“[Whizlabs Exam Simulators](#)”, not only give you unmatched and proven quality content but also help you prepare and retain whatever you have learnt all the way to your exam and thereafter. Here explained, step by step, is how it works for you!!

Step 1 Diagnostic Exam - Assess yourself

This exam with its specially designed set of questions will help you identify your strengths and weaknesses that need to be worked upon.

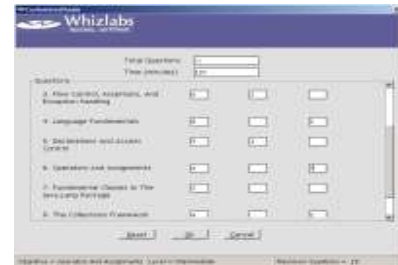

Step 2 Practice Exams - Practice your skills

The set of Practice Exams available here, will help you practice more on the actual certification exam pattern.

Step 3 Customized Exams - Focused practice

You can practice again with the customized exams, but with an option to choose yourself, the number of questions, topic, and difficulty level of the questions and that too in the areas you find yourself weak. This will help you mould your preparation in the way you want.

Step 4 Quiz - Squeeze that extra second

Make your study complete by mastering how to manage your time while answering questions under strict time constraints. The feature of Quiz in Whizlabs Simulator has been designed just for this. In this feature, you'll have option to choose the number of questions from various exam objectives and the time for which the question will be displayed. Study could never be so interesting without this feature!!

Step 5 Tips N Tricks - Dos and don'ts

There are things that you must do and there are certain others that you must not; we make sure through Tips N Tricks that you know them all. Tips N Tricks help fine tune your approach and avoid mistakes that others commonly do.

Step 6 Quick Revision Notes - Instant revisions

Here is a handy list of small pointers straight from heart of the exam course, which will help you revise the entire course instantly. Whizlabs simulator includes these notes as 'part' of its features.

Step 7 Final Exam - Grand finale

Last comes the final exam with which you conclude your preparation to walk in the exam room fully confident and walk out with success.

Whizlabs Authors – “Content Credibility”

In its first 3 years only, Whizlabs has helped over 280,000 software professionals earn their dream certifications. This would not have been possible without constant improvement in the quality of Whizlabs products and its content to the level of customer satisfaction. Whizlabs has a highly respected, exceptionally outstanding, brilliant, and certified pool of authors, who have contributed their over '225 years' of cumulative experience while authoring high-quality content for the simulators.

The authors have strong technical competence to say things with authority and clarity. Their experience ranges from working in their respective technology to imparting knowledge to others. The content is developed with the difficulty level conforming to the actual exam standards and undergoes stringent process standards complying to ISO 9001:2000.

Customers' Say

“I am impressed with the quality of content, especially the explanations. The questions were similar to the actual exam but tougher. Great job!” - Thomas, UK (Jan'04)

“I Rate You Top 1 %” - Suhas Malik, Training Manager - IT Certifications (MCSE, CCNA, OCP, Java), Bangalore (Dec'03)

“Thanks Whizlabs for your simulations. It made me secure my job in the last layoff round at my organization. I owe my success to you.” – Chris, Delaware, USA (Feb'04)
